Portfolio: www.mtechorbit.com | GitHub: github.com/dev0malaya | Hyderabad, India

PROFESSIONAL SUMMARY

Results-driven AWS Cloud & DevOps fresher with hands-on experience in designing, deploying, and managing cloud infrastructure on Amazon Web Services. Proficient in EC2, S3, IAM, VPC, Lambda, RDS, CloudFormation, and CI/CD pipelines using Jenkins and GitHub Actions. Passionate about automating infrastructure, reducing deployment time, and improving system reliability. AWS Certified Cloud Practitioner. Seeking a challenging cloud/DevOps role to apply technical skills and contribute to organizational growth.

TECHNICAL SKILLS

AWS Core Services: EC2, S3, IAM, VPC, RDS (MySQL/PostgreSQL), Lambda, CloudWatch, SNS, SQS, Route 53, CloudFront, ELB/ALB

AWS DevOps & IaC: CodePipeline, CodeBuild, CodeDeploy, CloudFormation, Elastic Beanstalk, ECR, ECS, EKS (basics)

Containerization: Docker, Kubernetes (kubect!, Deployments, Services, Ingress, ConfigMaps, Secrets), Helm (basics)

CI/CD Tools: Jenkins, GitHub Actions, GitLab CI, ArgoCD (basics)

Infrastructure as Code: Terraform (AWS Provider), AWS CloudFormation, Ansible (basics)

Scripting & Programming: Bash Shell Scripting, Python (boto3, automation), YAML, JSON

Monitoring & Logging: CloudWatch Metrics/Alarms/Logs, Prometheus, Grafana, AWS CloudTrail

Version Control & OS: Git, GitHub, GitLab, Linux (Ubuntu/Amazon Linux), Windows Server

Networking & Security: VPC Subnets, Security Groups, NACLs, SSL/TLS, AWS WAF, IAM Policies & Roles

PROJECTS

3-Tier Web Application on AWS | Personal Project

- Architected and deployed a highly available 3-tier web application (Presentation, Application, Database) using AWS EC2, Application Load Balancer, Auto Scaling Groups, and Amazon RDS (MySQL)
- Configured VPC with public/private subnets across 2 Availability Zones, Internet Gateway, NAT Gateway, and route tables following AWS Well-Architected Framework security best practices
- Provisioned entire infrastructure using Terraform (IaC), reducing manual setup time by 70%
- Implemented CloudWatch alarms and SNS notifications for CPU, disk, and error rate thresholds, achieving proactive monitoring
- Stored static assets on Amazon S3 with CloudFront CDN, reducing page load latency by 40%

Tech Stack: AWS EC2, ALB, ASG, RDS, S3, CloudFront, VPC, Terraform, CloudWatch, SNS

CI/CD Pipeline with Jenkins & AWS CodeDeploy | Personal Project

- Built an end-to-end CI/CD pipeline using Jenkins, GitHub, and AWS CodeDeploy to automate deployment of a Node.js microservice to EC2 instances
- Integrated SonarQube for static code analysis and automated test execution at the build stage, improving code quality
- Configured GitHub Webhooks to trigger Jenkins pipeline on every code push, achieving zero-touch deployments
- Implemented blue-green deployment strategy using AWS CodeDeploy to achieve zero-downtime releases
- Containerized the application using Docker and pushed images to Amazon ECR for version-controlled artifact management

Tech Stack: Jenkins, GitHub Actions, AWS CodeDeploy, EC2, ECR, Docker, SonarQube, Node.js

Kubernetes Microservices Deployment on AWS EKS | Personal Project

- Deployed a microservices-based e-commerce application (6 services) on Amazon EKS cluster with managed node groups

- Created Kubernetes manifests (Deployments, Services, Ingress, HPA, ConfigMaps, Secrets) and used Helm charts for templated deployments
- Configured NGINX Ingress Controller with SSL termination and Route 53 DNS routing for production-grade traffic management
- Set up Prometheus and Grafana monitoring stack for real-time metrics visualization and alerting on pod health and resource usage
- Implemented Horizontal Pod Autoscaler (HPA) to automatically scale pods based on CPU utilization, handling 3x traffic spikes

Tech Stack: AWS EKS, EC2, ALB, Route 53, Docker, Kubernetes, Helm, Prometheus, Grafana, Python

EDUCATION

Master of Computer Applications (MCA) — KIIT Deemed to be University <i>Bhubaneswar, Odisha</i> CGPA: 6.9	2023 – 2025
B.Sc. — Utkal University <i>Puri, Odisha</i> CGPA: 9.12	2020 – 2023
Class 12 (Higher Secondary) – Jupiter Science H S School <i>Bhubaneswar, Odisha</i> Percentage: 63.16	2018 – 2020
Class 10 (BSE) – Belabhum High School, Astaranga, Puri <i>Puri, Odisha</i> Percentage: 90	2018

PROFESSIONAL TRAINING

Multi-Cloud with DevOps Trainee | *Naresh i Technologies*

- Learning core cloud platforms including AWS, Azure, and GCP.
- Gaining hands-on practice with DevOps automation tools such as Linux, Git, Jenkins, Docker, Kubernetes, and Terraform.

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi , Odia (Native)

Soft Skills: Problem-solving, Team Collaboration, Quick Learner, Attention to Detail, Strong Communication

Interests: Cloud Architecture, DevSecOps, AI/ML on AWS, Open Source Contributions, Tech Blogging
